Career Objective

Java Backend Developer with hands-on experience developing RESTful APIs using Java and Spring Boot, working with MySQL, Spring Security, JWT, and SQL. Experience building and deploying production-oriented full-stack applications and implementing role-based backend systems.

Education

Selvam College of Technology

B.E. Biomedical Engineering, CGPA: 8.25/10

Namakkal, Tamil Nadu

2022 – 2026

Amala Girls Higher Secondary School

HSC: 86% | SSLC: 91.6%

Musiri, Tamil Nadu

2020 – 2022

Work Experience

Software Developer – APM Systems

Coimbatore, Tamil Nadu

May 2026 – Present

- Independently designed and developed **ResiTrack**, a full-stack residential community management platform using **Java, Spring Boot, MySQL, React.js, and REST APIs**.
- Designed and implemented backend services and **RESTful APIs** for resident management, payments, complaints, maintenance, notifications, and user management.
- Implemented secure **role-based authentication and authorization** using **Spring Security and JWT** for Administrator, Resident, and Security Personnel roles.
- Designed the **MySQL database schema**, relationships, CRUD operations, and SQL queries supporting core application workflows and reporting.
- Developed and integrated the **React.js frontend** with Spring Boot APIs, and packaged the application as an **Android app using Capacitor and Android Studio**.
- Managed development, API testing, source control, and deployment using **Postman, Git/GitHub, Maven, Render, and Vercel**.

Projects

ResiTrack – Residential Community Management System

[Live Demo](#)

Java, Spring Boot, Spring Security, MySQL, React.js (Vite), Tailwind CSS, JWT, Capacitor, Render, Vercel

- Built and deployed a full-stack platform for managing **residents, payments, complaints, maintenance, notifications, and security operations** through web and Android applications.
- Structured the backend using **Spring Boot REST APIs** with separated application responsibilities for handling business logic, data access, authentication, and application workflows.
- Implemented **JWT-based authentication and role-based access control** to restrict application functionality according to Administrator, Resident, and Security Personnel permissions.
- Designed a **normalized relational MySQL database** supporting resident records, payment tracking, receipts, complaints, and related application data.
- Developed a responsive **React.js (Vite) frontend** with Tailwind CSS and integrated it with backend REST APIs for end-to-end workflows.
- Packaged the web application as an **Android application using Capacitor and Android Studio**, and deployed the backend and frontend using Render and Vercel.

Technical Skills

- Programming Languages:** Java, SQL
- Backend Development:** Spring Boot, Spring Security, RESTful APIs, JDBC
- Database:** MySQL, Relational Database Design
- Authentication & Security:** JWT, Role-Based Access Control
- Frontend:** React.js, Vite, Tailwind CSS
- Mobile Development:** Capacitor, Android Studio
- Build & Development Tools:** Maven, Postman, Git, GitHub, Eclipse, VS Code
- Cloud & Deployment:** Render, Vercel, MySQL Cloud Database
